Introduction

“Hold him as a foe” meaning Oh people, hold Satan as a Foe.

Dear reader, I am happy to share my thoughts with you and that you have read my lines, which may give you an idea about what is happening around you in this mined world.

Have you ever wondered about who the one **Enemy** of all humanity is?! If the answer that comes to your mind is Zionism or the dictatorships across the world, you are wrong. Rather, the first enemy to humanity is Satan (Satan), the cursed creature who threatens the children of Adam to be tempted and misguided. Allah “*Subhanathu wata’ala*” the Almighty warned humanity in the holy Quran, of Satan’s deception and misguidance, Quote: “O you who believe, do not follow the footsteps of Satan.”

Satan always seeks to embellish his steps with things that attract the desires of the soul. In this short research, I will shed light on the secrets of the systematic goals to cause people, especially the new generation, to fall into the abyss of Satan.

Let us take you on a journey through which we shall know about the plots set out to overwhelm the entire world, and to target Islam in specific with five destructive elements, which are:

- 1. Atheism**
- 2. Feminism**
- 3. Humanism**
- 4. Homosexuality**
- 5. Triviality Industry**

Secularism

Why will we address secularism?

In fact, secularism is the source of the ideas we will talk about, and which in turn, seek destroying the next generations through destroying family structure, permitting all pleasures, and calling for freedom of atheism, sex, bank interest and anything that help increase human nature deviation and decline.

Simply, the idea of secularism is a call to base the world on science and reason, being – in their opinion, the only way for the individual to enjoy complete freedom by disconnecting religion from the state and from any personal interest. By this call which promotes freedom from religion and from any moral obstacle to material interests, it will result in a chaotic, irreligious generation whose only concern is to seek to satisfy his physical and mental pleasures, earn money, and to benefit from wealth in any way whatsoever.

Of course, denying the existence of Allah “the Creator” and constantly challenging the Islamic religion are two basic goals of secularism.

Some of Secularism Ideas and Objectives

First: Separating of Religion from State

One of the basics of secularism is atheism where a person belongs to no religion or belief, however their focus is to separate religion from the state and politics, which in turn allows everyone having power and authority over the society to, act and rule for his own worldly interests.

Second: Capitalism

Secularism is one of the biggest promoters of capitalism which is based on utilitarianism principle which stipulates that life is based on materialism and that money is everything in life and permits dealing with interest and to pursuit happiness through earning and benefiting in any way even if at the expense of others.

Third: Pornography

Secularism is based on allowing all pleasures and spreading moral chaos by calling for free intertextual relations, promiscuity, homosexuality, cohabitation before marriage, and more to open the

door to all vile practices which will, over time, cause a complete disintegration of the common human nature.

Fourth: Fighting Islam

As we have previously mentioned, secularism calls for freedom from religions and atheism, but its main objective is to fight Islam, because most of the European people in this time claim that they follow Christianity, but in fact they abandoned religious, and therefore secularism focus now on challenging the Islamic belief through all types of media platforms.

First Destroyer:

Atheism:

Atheism is a philosophical doctrine based on the idea of “nihilism,” which denies the existence of a Creator, and that the universe and all creatures came into existence by chance. As we previously mentioned, the contemporary supporter of this idea is secularism communism.

Atheism in general is a new idea that did not exist in ancient times except in very rare cases, where an individual decides at his own discretion to disconnect from religion or God and seeks to live his life in luxury free from any belief.

In the modern era, the idea of atheism has developed and widely spread and promoted by many fields which cannot be counted. However, people’s atheism is often limited to the following three types:

First: Emotional Atheism

Emotional or declamatory atheism usually occurs among people who have been exposed to severe psychological crises or very difficult situations such as imprisonment for years, torture, or on the occurrence of dreadful crimes before their eyes. These types of events lead to severe psychological shocks leading to loss of faith in God the Almighty. Often, these atheists have a feeling of anger and constantly mock religion or God.

Second: Material Atheism

Materialistic or utilitarian atheism spreads among the persons who deny the existence of God Almighty for the sake of their personal interests, financial benefits, or for the sake of their pornographic pleasures and seek freedom from any religious restrictions that

prohibit and reject these actions and behaviors. Therefore, they deny the idea of God's existence to numb their conscience and enjoy these benefits and desires.

Third: Intellectual Atheism

Intellectual or cultural atheism arises from the belief and influence of the theories that conflict with religion and question the existence of the Creator such as the secular ideas calling for accepting the western culture and some of the books of Jewish scholars that were published in the last century and that are considered as among the most dangerous atheistic books. This type of atheism is now spreading very widely, not only through books and doctrines, but also through special social media sites which spread these ideas through entertainment, scientific or even religious content. We will look at some of these in this piece of work.

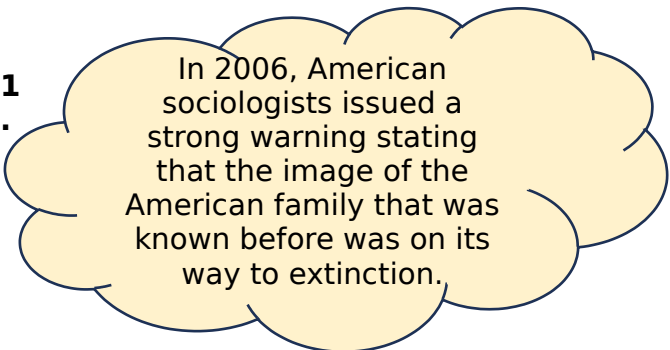

Second Destroyer:

Feminism

Feminism, in all its wings, believe that family is a bad deal from which only men have benefit, while it is considered as a restriction and burden for women, and limits their role in childbearing and care. Feminists' positions on the family vary between preserving it and making some changes to its structure or the nature within of the relationships and rejecting the family completely. The first trend is represented by secularism or liberalism, and the second trend is represented by communism and part of psychology feminists.

It is for certain that this movement is nothing but a women reaction against the western society. If we consider women situation in the west for several decades ago, we will see that injustice and domination by men over women was the norm. According to their stand, women were created for men pleasure, and they must obey their orders and tolerate men domination, oppression and torture, because according to their view of religion, women are the cause of misery of the human race.

1

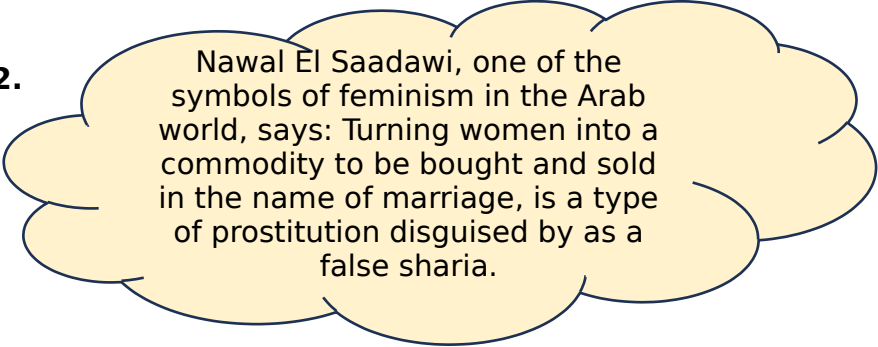

In 2006, American sociologists issued a strong warning stating that the image of the American family that was known before was on its way to extinction.

As such, western women did not consider their religion as their savior for this oppression and injustice, and in the meanwhile they did not have a divine law that demarcates boundaries and clarifies women's rights and duties based on right and justice, the how their reaction will be? Women's attention turned to the values that their western society called for such as **freedom and equality**. Therefore, women's liberation revolution was launched with a sole objective that is to remove injustice and establish equality between males and females in everything. Soon later, feminists movement emerged and moved further to a stage of hostility against men and feminists slogans were launched the most prominent of which is "men can never be trustworthy, and that women must be hostile against men and compete with them in everything, and that woman must not make any effort for the man and no that no man must have authority over her, as she does not need a father, husband, brother or even children..

To this end, women must work and earn their living and depend completely on oneself in everything.

When feminism arrived in the Middle East, **it aimed at inserting its ideas into the core of Islam as a first stage to distort it**, and also to make Muslims, especially women, question the postulates of religion.

2.

Nawal El Saadawi, one of the symbols of feminism in the Arab world, says: Turning women into a commodity to be bought and sold in the name of marriage, is a type of prostitution disguised by as a false sharia.

They attempted to sever women's connection with the Islamic ethics, manners and legal rulings pertaining thereto, such as the hijab. In addition, feminism calls for unveiling and intermixing between men

and women in all fields, and to look at Europe and the West in general as an example in all matters related to women's social life, such as having the right to work, to sexual freedom, sports and cultural activities.

Now, let us go back to the western society and see the results that the feminism movement have led to: Discord and hostility between the mother and the father and their preoccupation which take them away from the children, led to collapse of family structure and fragmentation of the family unit. Several statistics conducted over time showed that millions of children ran away from home and stay without shelter due to lack of attention by the parents or the abundance of violence that they have experienced by their parents. It is worth noting that the results of having children by these families have caused spread of drugs and psychological crises among these abandoned children, in addition being exposed to sexual exploitation, as some of them sell their bodies for sexual practices in exchange for shelter.

What happened to the western societies?

After the girl left home and stay away from family, and she wanted to have independence from family and depend on herself to complete her education, she no longer had enough money to survive and therefore led to resorting to several methods that humiliated her and can be summarized in the term "**Sexual Commodification of Women**", one method of which is the recent spread of a phenomenon called:

The Sugar Daddy

Where she sells her body to a man who is in her father's age, and who hires her sexually and takes her with him wherever he goes as part of his personal belongings, in exchange for preserving her right to live and meeting her needs.

Hence, appreciation of women is limited to their physical attractiveness only, without giving any appreciation of their family and social status or their important roles in the society. Many women may suffer **body shame feeling** due to being in a society that only appreciates their attractiveness.

Accordingly, it is becoming natural for women to be sexually harassed by men frequently, whether in transportations or in the work environment. Woman may submit to sexual harassment fearing to lose her source of income "job", which caused a large percentage of

women to fall into a state of depression and psychological pressure due to this sexually frenzied atmosphere.

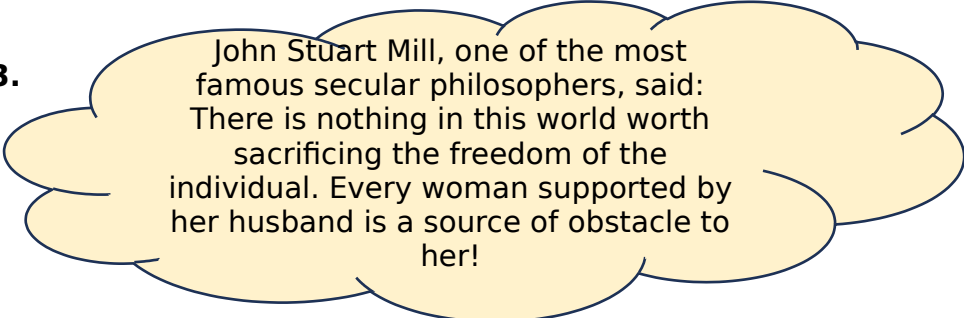

Such life is an abnormal life, because for a woman to feel that she is appreciated and cared for she must be attractive, and when women become attractive, the society becomes sexually promiscuous and she may be assaulted by men and will lose her dignity and self-respect, and there will be no shelter or refuge for her because she has acknowledged her independence from her family.

After we have seen the results of this disease that has afflicted the western societies and will spread in our societies if we do not spread awareness about the role of both men and women in life and define and clarify the duties that God Almighty has set out for men and women.

Equality between men and women is prejudicial and unjust, because God created each sex with a special nature governed by biology that differs from the other sex in a way that suits the role for which each sex was created. Therefore, the result of this equality was the loss of women's rights and the degradation of their femininity.

We realize that many women in our societies suffer all forms of oppression and injustice, even though Prophet Mohammed, *may Allah's peace and blessings be upon him*, have greatly stressed the necessity to care for women and stressed, at the last minute before his death, *that men should care for women by saying in the hadith: "The best of you is he who is best to his women, and I am the best among you to my women."* Women here means mother, sister and wife and daughter. (Narrated by Al-Tirmidhi). As such, prophet Mohammed made the good treatment of women as standard for man's good manner and character, which is in the meantime a measurement of faith. **This is only one hadith from among many noble hadiths and verses regarding good treatment of and kindness to women.** Unfortunately, despite of these clear commandments, oppression of women in our society has become a habit and culture for many and has overshadowed our piety. We must spread awareness that life will never be sound for both man and woman unless they both submit to the relationship that Allah the Almighty has accepted for them and assigned to them. Moreover, there is a fact that no one can nullify or revoke that Allah the Almighty has created man and woman to complete each other and the lack of either of them render the other incomplete.

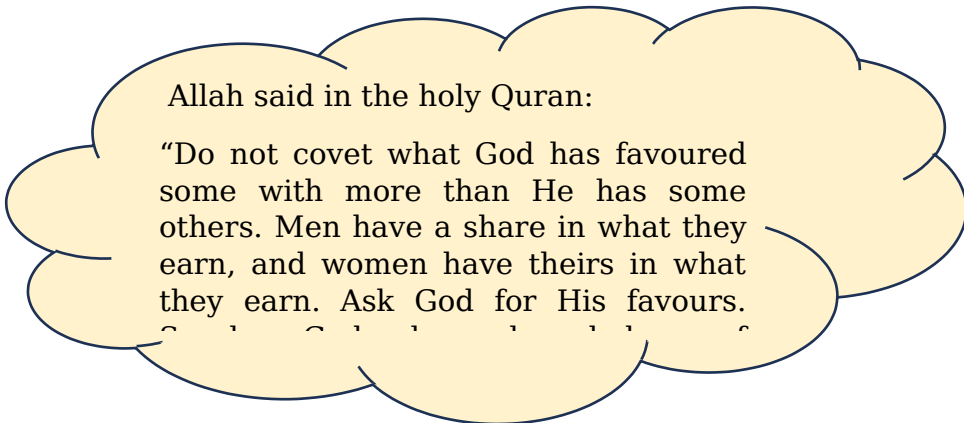

3.

John Stuart Mill, one of the most famous secular philosophers, said: There is nothing in this world worth sacrificing the freedom of the individual. Every woman supported by her husband is a source of obstacle to her!

A woman who believes that having a man in her life is not necessary is a fool, because the presence of a man in a woman's life is a blessing that brings with it a sense of stability, calmness, and reassurance. A kind word of a man revives a woman's heart. A man who believes that the presence of a woman in his life is not important, is denying the truth and live a life lacking stability and tranquility, miserable and without glory or productivity.

The real development that we must all strive for is the development that achieves integration, balance, and sustainability of life between men and women at home, work, society and family relationships while ensuring the bringing up and education of a righteous generation that stands up to the oppressor and revives the word of truth.

Allah said in the holy Quran:

"Do not covet what God has favoured some with more than He has some others. Men have a share in what they earn, and women have theirs in what they earn. Ask God for His favours.

Third Destroyer:

Humanism

Humanism or the "**cute atheism**" falls under the definition of **embrace humanity first** then embrace whatever religion you like, which means that the most important thing is the society and human

coexistence, but God and the circle of faith are secondary and not a priority.

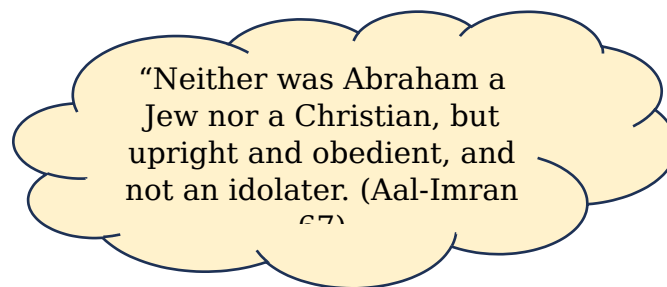

Atheism do not accept any faith that deprives them of the slightest fortune in this world, but they happily accept anything that deprive them from their afterlife in the name of the “**man first**” because they simply do not believe in it.

This humanism thinking began spreading widely in the last two years. It is no longer inserted into young people’s minds via one method only, but rather many methods and ideas of misinformation have branched out. One of the most important main axes of this thought is:

The New Abrahamic Religion

Abrahamitic means that all heavenly religions trace their origin back to Abraham, *peace be upon him*, the therefore they want to unify the three religions (ISLAM, Judaism and Christianity) and put them in a new mold titled (the “**Abrahamic religion**”) under the slogan: “**All paths lead to heaven**”. Many governments have begun supporting this religious project officially and publicly, and started building worship centers, in addition to inventing a new prayer called the “**Thursday Prayer**” which shared between the three religions. The long-term objective of this new Abrahamic religion is to wipe out the Islamic identity by the identity of humanity, peace and coexistence, and to remove all boundaries between Islam and other religions and nationalities.

Allah the Almighty said in the holy Quran:

What they call “moderate Islam.”

Nowadays, malicious media and many charlatans who misrepresent religion have begun to export the idea of the **cute Muslim**. They want a Muslim who has no opinion or influence on the society. It is enough for him to be peaceful and accept all opinions, doctrines, and ideas, even if they are oppositional or offensive to Islamic Sharia rulings,

and they describe immorality as religion moderation and describe adherence as backwardness and extremism.

To them, they accept any increase or reduction in religion in the name of humanity and peacefulness, with an objective to force Islam to be compatible with the secular era.

New Era Movement

Perhaps this movement does not relate to humanism directly, but we must mention it because it is classified as the most dangerous abyss that have arisen recently. Those who always talk about spirituality, healing self with the energy of nature and the universe, yoga, and all this sorcery fall under **demons' actions**. If you look into their rituals, you will find out that they are derived from Buddhism and Hinduism. I will not go deeper into this for now. The problem is that Muslim scholars have a very superficial background about this, and many people began drifting into this satanic world. You will be shocked knowing the areas that this movement has penetrated and is often prominent in anime series. I will provide you with an overwhelming reference for more information on this at the end of this book.

Fourth Destroyer:

Homosexuality

Homosexuality did not occur in this era, but rather goes back deep in history. When we look at the history of ancient civilizations, we will find that in most of these civilizations there were groups who practiced homosexuality with variable percentage from one civilization to another. Homosexuality is not our topic here, but we shall throw light on the methods they use to introduce this disease into the society.

No doubt that **Netflix Platform** is the official and global sponsor and promoter of homosexuality all over the world in this era. Netflix is full of films and series that contain deviant practices such as homosexuality, lesbianism, pedophilia (psychological disorder where adults are **sexually attracted to children**").

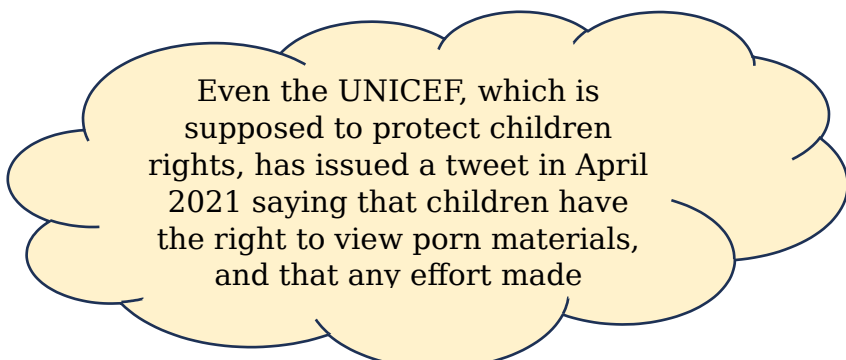

In fact, Netflix platform succeeded in promoting homosexuality around the world. Things simply start with a very ordinary series, but it contains only one character who has homosexual tendencies. At first, the sound individual may not accept this character, but over time and with the enthusiasm and increase of enjoyment of events and acceleration of the episodes, this character will become ordinary or

even important for the viewer. They are very keen to present this type of personality as complete in all aspects. They present this character as extremely creative and productive and enjoys excitement that suits the scenario. Little by little, the individual begins to see more on this platform until he reaches the stage where he watches materials and scenes that relate to homosexuals, nudity with enthusiasm and acceptance.

At this stage, the individual's Fitra (nature) and sound mentality will relapse and start accepting this type of character in social and real life because, according to the subconscious mind, homosexuality is only part of the natural diversity and difference of this person, and therefore he should not be prevented from living in this society as a normal person. It is surprising that such homosexual may be considered as a model having a particular role in the society.

Let us move away from Netflix for a moment and talk about a much more dangerous matter, that is **pornographic movies**. Perhaps some will be surprised by the relationship between pornographic films and changing an individual's inclinations, but, the vast majority of porn addicts end up becoming perverts. After the addict has passed a certain period watching pornographic clips, his brain will not produce the same percentage of dopamine hormone responsible for the feeling of excitement and happiness, so he will begin searching for other types of films until it he reaches very advanced and dangerous stages, the most famous of which are homosexuality and incest.

Just imagine what outcomes the society will encounter if a child, at a very young age, begins eating and in the meantime watching pornographic materials with boldness and freedom. This child, who is still discovering the world, will discover himself, his body and instincts, and will be carried away at a young age to instinct with such great power that he will not be able to control. What will the future of this child be like when there is a thought and feeling of this power controlling him? Will he be able, being busy with all this, to turn into a productive person in the society? Will he be able to discover his skills? Will he be able to see the world with no sexual eyes? Will he be able to meet his human needs which will give him total balance in life?

Even the UNICEF, which is supposed to protect children rights, has issued a tweet in April 2021 saying that children have the right to view porn materials, and that any effort made

Fifth Destroyer:

Triviality Industry

The truth is that wherever you look in this era, you will find that the industry of triviality has taken over entire societies, and whenever you try to follow the good path of knowledge, literature and honesty, you find that everything around you drag you towards amusement, dancing, and lying. It is impossible to count how much sources of triviality are around in all fields and activities. We shall not talk about the content of triviality itself, but rather about the secrets behind its spread in the societies around the world.

The benefits and gains that an individual can achieve from the social media are very numerous and attractive, especially since it is not just a specific content. Any content whatever, can be earned from. Therefore, ignorant, and uneducated or skilled people turned to this field triviality. They began publishing content that is useless, unfunny, extremely trivial and often immoral.

However, when we look at the world of numbers, we will be surprised that these ignorant people are leaders in impressively high numbers of views.

I believe that the cause drift of a large number of people of our Ummah to this type of triviality and idiocy nowadays is the:

Meaningless Life

Which most young males and females experience unfortunately. They neither have a cause of life nor an objective to live for, and no longer the values have any effect over their bad habits, nor they have the power or will to overcome these bad habits. They sleep and wake up without any goal or achievement that may give them value or self-respect, or help them overcome several obstacles they will face in life.

This type of persons is He is an empty person who spends most of his day watching movies and series and following people, or rather bubbles, all of whose content does not go beyond pranks, dancing, or lying and misleading people, including violating the sanctity of one's privacy. It is very natural for him to be like that if not advised or help

by other caring person to discover himself and find a purpose for his life, and start organizing his time, educate himself in his faith, develop his personality from all aspects so that he will not be overwhelmed by Satan, and to improve socially and emotionally and open new horizons of knowledge for himself.

The real problem does not lie in the trivial people themselves, because it is very natural for any society to have a layer of them but not widespread at this level. With the loss of the generation due to their emptiness and lack of awareness, the situation is getting worse day by day. Moreover, the matter has gone beyond being merely trivial, for an application such as Tiktock is full of nudity, decadence, insults to God the Almighty, cursing religions, slandering. This is in addition to tons of ignorance and stupidity spreading in an enormous manner, and the shocking opinions and ideas that are presented in a way that sound minds cannot comprehend, not mentioning the live broadcasts which are based on trivial challenges where the loser will be subject to harmful and completely shameless judgments.

However, if we turnback to **Hollywood or Netflix** in particular, most of empty persons spend most of their time watching Hollywood or Netflix programs and series. It is worth noting that we are not talking now about waste of time only, but rather about wasting of human's minds. It is very rare that to find a person who is addicted to watch these movies without having a faith, social or emotional problem, because Netflix destructive goal is not limited to perversions, but they have also many series that explicitly promote everything previously mentioned which vary from justification of forbidden relationships between teenagers to dealing in drugs, hashish and many more to end up beautifying the image of Satan and distorting the commandments of God.

It is important to realize and spread awareness among the society that emptiness spreading in the society leads to destruction and misguidance which strongly directed to influence the next generation. These ideas that are presented without legitimate sources or logic will determine youngsters' awareness and contribute to their way of analyzing their aspects of life.
